

MOBILITY

# Mobility Solutions

## WIRELESS DESIGN

Let our expert wireless engineers help you design a scalable, secure and resilient wireless network while delivering impressive performance to enable seamless communication and unparalleled work flexibility. Whether you have the need for a high-density deployment for your classroom environment, or you need a hardened solution for your warehouse scanning and automation, LA Networks has the experience to build you a wireless network that meets your needs from the ground up.

## PROFESSIONAL SITE-SURVEY

Performing a wireless site survey is the best way to ensure a proper wireless deployment for your company. Our engineers use the latest technology and software to perform active and passive wireless site surveys which culminate in reports that detail wireless signal propagation, radio frequency interference, neighboring wifi access points, and the best locations for access point mounting.

## WIRELESS SECURITY

Wireless security can be much more important to address than wired, due to the ephemeral access to broadcasted wireless signals, and we offer wireless security assessments to review your configurations and offer detailed reports based on our findings. Even if your company does not allow wireless networking, do you have a solution in place to prevent a "rogue access point" from being surreptitiously connected to your network? LA Networks has solutions to discover and prevent these types of threats to your network.

## CLOUD WIRELESS

Are you thinking of managing your wireless solution from the cloud? If you want to take advantage of the ease of use, manageability and performance of a cloud powered wireless infrastructure then Meraki might be the right solution for you. We have experts in deploying the latest Meraki cloud wireless solutions.

## TROUBLESHOOTING & MANAGEMENT

A wireless deployment is only as good as having the ability to manage it properly. Cisco Prime Infrastructure with Mobility Services Engine can drastically reduce troubleshooting time and provide the kick needed to resolve wireless helpdesk tickets in no time. Our engineers can provide a demo to introduce you to these tools that should be in everyone's wireless arsenal.

## ABOUT

We help different organizations of all shapes and sizes understand, adapt, implement and evolve infrastructure technologies in the areas of collaboration, data center, mobility, networking and security.

Our differentiator is subtle, yet highly significant. We are an authentic, engineering-first organization and stay true to this identity. Technology excites and intrigues us and we never stop working to master the latest innovations from our key partner, Cisco.

Within greater Los Angeles, we are known as the go-to partner for Cisco who has the experience and ability to flawlessly execute the most complex enterprise-class solutions. We are a Cisco Gold partner, the pinnacle of Cisco partner certification.
