

**SECURITY**

# Security Solutions

## EMAIL SECURITY

Protect against ransomware, email compromise, spoofing, and phishing. Utilize advanced threat intelligence to protect inbound messages and sensitive outbound data.

## INTRUSION PREVENTION SYSTEMS (IPS)

While firewalls prevent the unauthorized access into a network, Intrusion Prevention Systems actively monitor activity of devices, applications and communications within the network to identify and act on threats and breaches should they arise.

## POLICY & ACCESS CONTROL

Unify and manage your entire company's network and data access privileges from a centralized dashboard accounting for user roles, device types, location, and time-of-day. Ensure access to all of those that need it while seamlessly turning away unauthorized parties.

## FIREWALLS

Firewalls actively monitor incoming and outgoing network traffic, allowing authorized access to pass through with little difficulty while inspecting suspicious activity and quarantining threats to keep your system secure.

## MALWARE PROTECTION

By utilizing various security functions such as threat analytics and behavioral indicators, Malware Protection defends against your endpoints and networks against hostile Trojans, viruses and other malicious software.

## REMOTE ACCESS

By promoting the mobility of your workforce, you give employees access to your network from anywhere. However, securing this access is paramount to the integrity of your network. Whether you need a mobile SSL VPN connection, or a SOHO firewall solution, we can help.

## WEB SECURITY

By utilizing security gateways and application control, you can protect your employees and your network from inappropriate or dangerous websites and other unseen threats.

## ABOUT

We help different organizations of all shapes and sizes understand, adapt, implement and evolve infrastructure technologies in the areas of collaboration, data center, mobility, networking and security.

Our differentiator is subtle, yet highly significant. We are an authentic, engineering-first organization and stay true to this identity. Technology excites and intrigues us and we never stop working to master the latest innovations from our key partners.

Within greater Los Angeles, we are known as the go-to partner for Cisco who has the experience and ability to flawlessly execute the most complex enterprise-class solutions. We are a Cisco Gold partner, the pinnacle of Cisco partner certification.
